

WHEN THE TREATY OF PEACE IS MADE

WHEN the time comes to make a treaty of peace to end this war, we must have in the Senate, the place where treaties are ratified, men of the highest ability, the broadest experience, the best judgment and the most pronounced Americanism. Our future will be in the balance. Every man, woman and child will be affected—each one of us will be directly or indirectly concerned by what is then done. There must be no peace without victory. The victory so dearly won by our boys on the field of battle must be defended and safeguarded at the Council Board of the Nations.

UNIQUE FEATURE AT STATE FAIR

Gigantic Sixty-foot Column Constructed of Fruits and Vegetables to Be Erected.

Many new and unique features have been secured for the 1918 Michigan State Fair, at Detroit, August 30 to September 8, but one of the most beautiful and striking displays will be the Fruit and Vegetable column. Nothing similar has ever been attempted in Michigan. A gigantic column, standing 60 feet in height and 15 feet in circumference, will be constructed of every variety of fruit, vegetables and grains obtainable. It will be a monumental tribute to

Nature and a patriotic exhibit as well, for the products as they begin to over-ripen will be replaced and the mellow crops will be turned over to the canning clubs for preserving. The produce will then be sold at auction and the proceeds turned into the Red Cross fund. The idea and design for the monument were worked out by a leading eastern artist for G. W. Dickinson, Secretary, Manager of the fair association. Natural colors of the fruits will be so blended that artists declare the pillar will be as beautiful as the rainbow. For the designs on the main portion of the column vegetables and flowers will be utilized while the filling will be composed of grain, apples, pears and green and red peppers. The shield at the base will be prepared with nuts and spices, while the foundation of the structure will be made up of the larger vegetables such as melons, pumpkins and squashes. Topping the pillar sheaves of wheat and shocks of corn will sway before the breeze and Old Glory will float at the pinnacle proclaiming to the world her pride in the products of the United States. The construction of the various designs and the setting up of the exhibit will begin a month before the opening of the fair on August 30, and tons of decorations will be used.

Announcement has been made by G. W. Dickinson, Secretary-Manager of the Michigan State Fair, to be held in Detroit, August 30 to September 8, that Friday, September 6 will be observed as Michigan Day. Governor Sleeper and many state officials and members of the congress will hold receptions on the grounds during the day.

"DON'T WORRY ABOUT CANADA"—PRESCOTT

THE DOMINION IS DOING ITS FULL PART IN FOOD CONSERVATION.

GERMAN RUMORS SAY DIFFERENT

In many ways Our Canadian Neighbor Far Exceeds Us in Regulations to Save Foodstuffs.

Lansing, July 4.—"Pro-German propagandists have been more busy than ever, since January 1, 1918, trying to circulate rumors in America that will undermine the faith of the people in their government. The German propagandists were successful in Italy and in Russia. The results of their work are only too well known. Such propaganda must be carefully fought in America," says Food Administrator, G. A. Prescott.

"One of the systematic plans of propaganda since the German offensive of March 21 has been the circulation of rumors tending to discourage faith in Canada and her participation in the war. The rumor of interest to the Food Administration, and repeated in Michigan until it has become a dangerous rumor, is that Canada is making absolutely no effort to conserve food."

The Food Administration in Michigan, to combat the effects of this rumor, made a thorough investigation and has received scores of letters and bulletins from Canadian cities. This information is given herewith that you may be able to stop the repetition of this rumor in your community.

Here are a few of the facts about Canadian food conservation:

1. A penalty is provided for "proprietors of hotels, clubs, restaurants, cafes, steamships, dining cars, and etc., managers of institutions, church societies or lodges, private householders, or other persons who destroy or discard good food; also to wasteful picnic parties or travellers; also to hunters, fishermen, etc., who neglect to save game or fish secured by them."

2. Penalty is provided to persons who allow food to spoil, if it could be saved by cooking, canning or other treatment; also to careles and wasteful cooks; also to farmers, gardeners or other producers who neglect to protect grain, produce or other food against deterioration or loss; also to merchants who allow candy, fruit or other food to spoil by exposure in windows or open to flies, dust moisture, etc.; also to persons who, through careless storage, leave food accessible to rats, mice, or other vermin; also to handlers who cause waste by careless packing or shipping; also to public or private carriers, who negligently and cause waste or deterioration.

3. No pure wheat flour is being manufactured in Canada. Mills in Canada are grinding the whole wheat grain into "war flour."

4. No person is allowed to have more than fifteen days supply of flour on hand in town; thirty days supply in the country. The same applies to sugar.

5. Sugar bowls are not allowed on the tables of hotels and restaurants.

6. Use of sugar for candy, icings, etc., is restricted. Candy manufacturers are allowed only fifty per cent of last year's supply.

7. Canada now has two meatless days each week.

8. The use of war flour more than matches our wheatless days in America, according to the claim of some Canadians. Wheat flour substitutes are not produced in Canada hence the absence of a fifty-fifty rule there.

9. Farmers have been ordered to market their surplus wheat, just the same as American farmers have been ordered to do.

Dehydrated Food Products.

As food for armies in the field dehydrated products are almost ideal. One of the most important features of the food conservation movement in Germany since the outbreak of the war, a writer states, has been the practice of dehydrating fruits and vegetables and Germany's efficiency in connection with the conservation of that country's limited food resources is strikingly demonstrated by the fact that, after more than three years' isolation from the world markets upon which she formerly depended that nation still manages to feed its inhabitants.

In June, 1914, there were 480 dehydrating plants in Germany, treating annually about a quarter of a million pounds of potatoes alone. In a food conservation campaign organized at the time of Germany's first declaration of war 246 new dehydrating plants were added, 190 of which were aided by government funds.

Flowers on Mountain Tops.

It is known that upon many of the summits of the high mountain ridges of the Hawaiian Islands, in the regions of heavy rainfall, are open bogs which support a peculiar and interesting flora. Many species form more or less hemispherical tussocks which rise above the general level of the bog. A showy lobelia with numerous large cream-colored flowers as much as three and a half inches long, peculiar violet and a sundew are found there.

Don't Ask Personal Questions.

Never presume upon your intimacy with another to ask personal questions. No matter how good friends two may be, both have certain matters which they prefer to keep to themselves. The presumption which under the excuse of intimacy, pushes its way into the privacy of the spirit is unworthy of you. Respect your friends' reserves, and insist that they shall respect yours.

MRS. HOUSEKEEPER

Don't waste or burn your garbage. It is valuable.

ONE TON OF GARBAGE CONTAINS:

Sufficient glycerine for the explosive charge of fourteen 75 millimeter shells.

Sufficient "fatty acid" for the manufacture of 199 12-ounce cakes of soap.

Sufficient fertilizer elements to grow eight bushels of wheat.

A score of other materials valuable in munition making.

IF USED AS HOG FEED IT WILL PRODUCE

One hundred pounds of good, firm, first quality pork. Can you afford to destroy these valuable products when your government needs them to help win the war?

THE UNITED STATES FOOD ADMINISTRATION URGES EVERY HOUSEWIFE

To be watchful over what goes into the garbage pail; to put less in and take more out. But what must go into the pail should be kept separated from other household refuse so that it can be utilized either for making munitions or for hog feed. Do not permit broken glass, crockery, phonograph needles or other foreign substances to get into the garbage pail.

REMEMBER, GARBAGE IS VALUABLE. KEEP IT CLEAN!
